ETF**

A sub-fund of iShares IV plc

ISIN: IE000DR59CI3

Exchange Traded Fund (ETF)

Objectives and Investment Policy

- ▶ The Share Class is a share class of the Fund which aims to achieve a total return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the STOXX Global Energy Storage and Hydrogen Index, the Fund's Benchmark Index ("Index")
- ▶ The Share Class, via the Fund, is passively managed and aims to invest in the equity securities that, so far as possible and practicable, make up the Index.
- ▶ The Index reflects the performance of a subset of equity securities of eligible developed and emerging market countries globally within the STOXX World AC Universal All Cap Index ("Underlying Index"). Companies included in the Index are expected to drive the innovation and viability of energy storage and hydrogen economy solutions; and those that manufacture specialty materials and chemicals for the end products, such as batteries and fuel cells. The Index excludes companies from the Underlying Index which are identified by the index provider as being involved in certain business lines/activities deemed to have negative environmental and/or social outcomes ("ESG Requirements"), as outlined in the Index description of the Fund in the Fund's Prospectus.
- ▶ Companies included in the Index must (i) have a 3-month average daily traded volume (MDTV) greater than \$1 million (USD); (ii) have a free-float market capitalisation greater than \$200 million (USD); (iii) be domiciled in an eligible developed or emerging market country, also determined by the index provider; and (iv) be assigned to one of the eligible tier groups as determined by the index provider. The Fund's investment in securities that make up the Index will, at the time of purchase, comply with the ESG requirements of the Index. Where securities no longer meet such requirements, the Fund may continue to hold them until they cease to form part of the Index and it is practicable to sell them.
- ▶ The Fund will take into account such ESG criteria only when selecting the securities to be held directly by the Fund. The Fund may obtain indirect exposure (for example, through financial derivative instruments ("FDIs") i.e. investments the prices of which are based on one or more underlying assets and units in collective investment schemes) to securities considered not to satisfy these ESG criteria.
- ▶ The Index is a free-float market capitalisation weighted and rebalances on an annual basis.
- ▶ The Fund intends to replicate the Index by holding the equity securities which make up the Index, in similar proportions to it.
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties to generate additional income to off-set the costs of the Fund.
- ▶ Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index.
- ▶ Your shares will be accumulating shares (i.e. income will be included in their value).
- ▶ Your shares will be denominated in US Dollar, the Fund's base currency.
- ▶ The shares are listed on one or more stock exchanges and may be traded in currencies other than their base currency. The performance of your shares may be affected by this currency difference. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares (or interests in shares) directly with the Fund. Other investors can deal in shares (or interests in shares) daily through an intermediary on stock exchange (s) on which the shares are traded. Indicative net asset value is published on relevant stock exchanges websites.

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Share Class.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Share Class is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Share Class or expose the Share Class to losses.
 - Investments in the technology securities are subject to absence or loss of intellectual property protections, rapid changes in technology, government regulation and competition.

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Investments in energy securities are subject to environmental or sustainability concerns, taxes, government regulation, price and supply changes.
- The benchmark index only excludes companies engaging in certain activities inconsistent with ESG criteria if such activities exceed the thresholds determined by the index provider. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.

Charges

The charges are used to pay the costs of running the Share Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

*Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stock brokers.

*Authorised participants dealing directly with the Fund will pay related transaction costs including, on redemptions, any applicable capital gains tax (CGT) and other taxes on underlying securities.

The ongoing charges figure is based on the fixed annualised fee charged to the Share Class in accordance with the Fund's prospectus. This figure excludes portfolio trade related costs, except costs paid to the depositary and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
