HAN-GINS Indxx Healthcare Megatrend Equal Weight UCITS ETF –

ISIN: IE00BJQTJ848

Accumulating (“Fund”)

A sub-fund of HANetf ICAV. Managed by HANetf Management Limited (the **Manager**)

Objectives and Investment Policy

The Fund seeks to track the price and yield performance, before fees and expenses, of the Indxx Global NextGen Healthcare Index (“**Index**”).

Index: The Index is governed by a published, rules-based methodology and is designed to measure the performance of an investable universe of global companies that are active in the Advanced Life Sciences & Smart Healthcare sector and comprised of the following sub-themes: Robotics, Nanotechnology, Genome Sequencing, Healthcare Trackers, Biological Engineering, Bioinformatics, Neuroscience, Medical Devices, Telemedicine and Healthcare Analytics. The Index constituents are equally weighted. The Index also screens out companies based on some environmental, social and governance (ESG) criteria, details of which are set out in the Supplement to the prospectus for the Fund (“**Supplement**”).

Eligibility: To be eligible for inclusion in the Index, companies must: have their primary listing in "Developed and Emerging Markets" as defined by the Index administrator in its "Country Classification and Inevitability" document (further details of which are set out in the Supplement);

- meet the minimum market capitalisation and liquidity requirements; and
- must not be excluded based on the negative ESG screening and violations of UN Global Compact principles criteria as set out in the Supplement.

The Index is rebalanced semi-annually at the end of June and December.

Replication: The Fund will employ a "passive management" (or indexing) investment approach and will seek to employ a replication or representative sampling methodology, meaning insofar as possible and practicable, it will invest in all of the securities comprising the Index.

Dealing: Shares of the Fund (“**Shares**”) are listed on one or more stock exchanges. Typically, only authorised participants (i.e., brokers) can purchase Shares from or sell Shares back to the Fund. Other investors can purchase and sell Shares on exchange on each day the relevant stock exchange is open.

Distribution policy: Income received by the Fund’s investments will not be distributed in respect of the Shares of this class. Instead, it will be accumulated and reinvested on behalf of the shareholders of the Fund.

Recommendation: This Fund may not be appropriate for short-term investment.

Currency: The base currency of the Fund is US Dollar.

For full investment objectives and policy details, please refer to the Supplement.

The categorisation above is not guaranteed to remain unchanged and may shift over time.

The lowest category (1) does not imply a risk-free investment.

The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.

The categorisation above (7) is due to the nature of the Fund’s investments and risk associated with those investments, including:

- The value of underlying securities can be affected by daily financial market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- There is no assurance that any appreciation in the value of investments will occur, or that the investment objective of the Fund will be achieved.
- **Investment risk:** Investment risk may be concentrated in specific sectors, countries, currencies or companies. This

means that the Fund may be more sensitive to any localised economic, market, political or regulatory events.

- **Emerging market risk:** This Fund may invest in companies or securities markets in emerging market countries which may be riskier than investing in more developed countries.
- **Sectoral Risk:** Companies may be subject to patent considerations, intense competition, rapid technological change, industry innovation, long development cycles and large capital requirements that have a high chance of failure, regulatory approval, product obsolescence and government regulation.
- **Sustainability Risk:** The existence of sustainability risk may have a negative impact on, or result in the entire loss of, its value. Any sustainability risk can either represent a risk on its own or have an impact on other risks and contribute significantly to other risks, such as market risks, operational risks, liquidity risks or counterparty risks.
- **Currency risk:** The Fund invests in securities denominated in currencies other than its base currency. Changes in the exchange rates may adversely affect the performance of the Fund. Risks not covered by the indicator, but which are materially relevant to the Fund include:
- **Tracking error risk:** The Fund's performance may not exactly track the Index. This can result from market fluctuations, changes in the composition of the Index, transaction costs, the costs of

- making changes to the Fund's portfolio and other Fund expenses.
- **Liquidity on secondary market risk:** There can be no certainty that Shares can always be bought or sold on a stock exchange or that the market price will reflect the NAV of the Fund.

It may be difficult for the Fund to buy or sell certain investments in some market conditions. Consequently, the price obtained when the

Fund buys or sells securities may compare adversely to the price under normal market conditions.

For a complete overview of all risks attached to this Fund, refer to the section entitled "Risk Factors" in the Supplement and the Prospectus.
